

## GivePanel's Sub-Processors

Below you will find an up-to-date list of GivePanel's Sub-Processors, and the date on which they were appointed by GivePanel. Where a Sub-Processor has been appointed by GivePanel prior to the entering into of any Master Agreement, the entering into of the Master Agreement shall be deemed written notice as required under clause 1 of the Data Processing Agreement.

- **Google Cloud (incorporating Firebase and Firestore)** – 2019 – We use Google Cloud as the main underlying infrastructure behind GivePanel. It's where we host files and store data. Their servers are based in: BELGIUM, (europe-west1) and NETHERLANDS (europe-west4) <https://cloud.google.com/security>
- **SendGrid/Twilio** – 2020 – We use SendGrid for sending GivePanel emails (i.e. anytime you get an email notification from GivePanel). We also use SendGrid for the Email Journey feature that send emails to your supporters. They are based in the USA. <https://www.twilio.com/security>
- **Zapier** – 2021 - We use Zapier to allow our customers to automatically connect their GivePanel to the other services that are connected to Zapier. <https://zapier.com/privacy>
- **Nonprofit Megaphone** – 2021 – Nonprofit Megaphone provides Virtual Fundraising Challenge execution and other marketing services for our customers based in the USA. <https://nonprofitmegaphone.com/privacy/>
- **Google Maps** – 2023 – We use Google Maps to look up postal codes and return the correct address and a consistent format. They are based in the USA. <https://shorturl.at/ajkBQ>
- **Future Fundraising** – 2024 – Future Fundraising services our customers based in Australia assisting them to connect with donors, fundraisers, and volunteers, by either strategy or by building community connection groups. <https://www.futurefundraising.org/privacy-policy>
